What are reusable industrial containers used for?

These highly versatile, reusable industrial containers can be used to transport and store a wide range of bulk liquids and granulated cargo. Today's farmers value the IBC tote for its smart and practical design that boosts workflow efficiency and ensures product integrity from farm to table.

What are intermediate bulk containers?

In recent years, intermediate bulk containers, commonly known as IBC totes, have seen increasing use and popularity across agriculture and modern farming practices. These highly versatile, reusable industrial containers can be used to transport and store a wide range of bulk liquids and granulated cargo.

What are USDA's long-term agricultural projections?

USDA's long-term agricultural projections, also referred to as "baseline" projections, provide a scenario for the U.S. farm sector and global trade for the next 10 years. Projections cover agricultural commodities, agricultural trade, and aggregate indicators of each sector (such as farm income).

What are some examples of agrochemical reduction and management?

A good example is the "Financing Agrochemical Reduction and Management" (GEF FARM) project, funded by the Global Environment Facility, through which FAO is supporting Kenya and Uruguay to strengthen their enabling policies and regulatory frameworks to reduce and improve management of agrochemicals and plastics used in agriculture.

Bio-based plastics or biodegradable options, such as non-edible banana residues, offer promising solutions to improve the sustainability of plastics used in agriculture.

USDA's long-term agricultural projections, also referred to as "baseline" projections, provide a scenario for the U.S. farm sector and global trade for the next 10 years.

When assessing overall life cycle costs--from production through transportation to disposal--folding containers consistently exhibit lower long-term expenditures than traditional ...
