OSEventNameGet() allows you to obtain the name that you assigned to a semaphore, a mutex, a mailbox or a message queue. The name is an ASCII string and the size of the name can ...

Offering unprecedented ease-of-use, uC/OS-II is delivered with complete 100% ANSI C source code and in-depth documentation. uC/OS-II runs on the largest number of processor ...

Solar technology isn't limited to panels. Get to know microinverters - the latest in inverter tech - and gauge if they're suitable for your solar endeavor.

Advanced micro inverters for individual panel monitoring and maximum energy harvest. Ideal for shaded roofs. Shop top brands with expert support.

Learn about microinverters and how they stack up against other solar panel inverter options like power optimizers and string inverters.

To retrieve information on kernel objects, the OS Awareness uses the global uC/OS Variables and the structures defined in the ucos-ii.h file. Be sure that your application is compiled and linked ...

Shop micro-inverters from Unbound Solar. Offering the top brands and a varied selection of solar micro inverters.

Specifically, uC/OS-III was designed with 32-bit processors in mind, although it certainly works well with 16- and even several 8-bit processors. The main goal of uC/OS-III is to provide a best ...

Solar technology isn't limited to panels. Get to know microinverters - the latest in inverter tech - and gauge if they're suitable ...

This quick-start guide provides step-by-step instructions for running Micrium's uC/OS-II kernel on the SmartFusion2 Development Kit from Microsemi. The example project described herein is ...

Though uC/OS-III is used as an example, it is not presented as the canonical RTOS, and users of any real-time operating system will find this material immensely usable.
