How much does solar battery storage cost?

If you're looking to buy battery storage for your solar panels, you can probably expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+, depending on what you buy, who you buy it from and how you plan to use it.

How much does a solar battery cost in 2025?

While prices for solar batteries in 2025 range widely from around \$7,000 to \$15,000 installed, the long-term benefits can outweigh the initial expense. A battery allows you to store excess solar energy for nighttime use, reduce your reliance on the grid, and maintain power during outages.

How much does it cost to install a solar battery?

Cost estimates are powered by evolving AI-driven analyses of real homeowner experiences and trusted partner project data across the United States. The average cost to install a solar battery in 2025 ranges from \$9,000 to \$19,000, with most homeowners spending about \$13,000.

What types of batteries are used in a home solar system?

There are three main types of batteries commonly used in home solar systems: Lithium-Ion Batteries: These are the most popular option for residential use due to their high energy density, compact size, and long lifespan (typically 10 to 15 years).

On average, it costs around \$1,300 per kWh to install a battery before incentives. With the 30% federal tax credit applied, the cost is closer to \$1,000 per kWh. Update: This tax is only ...
