What is an industrial uninterruptible power supply system?

Industrial uninterruptible power supply systems (UPS Systems) include core technologies to cover industrial equipment. Our systems offer applications ranging from a few hundred watts to massive Multi-Mega Watt Parallel UPS installs inclusive of voltage regulations, voltage correction, sag correction, surge suppression and harmonic mitigation.

How do uninterruptible power supplies work?

For more information, check out our complete guide to uninterruptible power supplies. An online UPS system supplies power by converting incoming AC power to DC and then reconverts it to a stable AC output through an inverter, all while continuously charging the batteries.

What is an Allen-Bradley 1609 uninterruptible power supply?

The Allen-Bradley 1609 uninterruptible power supplies (UPS's) are designed for use in industrial applications to provide back-up AC power to the control cabinet for bridge dips, sags or brief line power losses with a capacity range of up to 1500VA.

Find everything you need to keep your systems running smoothly. A UPS (Uninterruptible Power Supply) system ensures that critical infrastructure remains operational during power outages, ...

The Allen-Bradley range of Uninterruptible Power Supplies (UPS's) are ideal for use in Industrial processes and are available in both a standard rugged design and a networking model option ...

RS New Zealand is a trusted supplier and distributor of uninterruptible power supplies from leading brands like Eaton, ABB, and Schneider Electric. Protect your equipment and maintain ...

Find everything you need to keep your systems running smoothly. A UPS (Uninterruptible Power Supply) system ensures that critical infrastructure ...
