---

The project will be delivered in stages, with initial construction expected to begin in late 2026 and full buildout of solar and battery facilities planned for 2027 and 2028. Officials at ...

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy ...

The industry is in the process of building 25 new or expanded manufacturing facilities to support the grid-scale energy storage market; of these, 11 are now in operation or under construction.

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...

"Safe and strategic deployment of energy storage will help drive economic development and reduce costs for New Yorkers."

This RFI solicits feedback on a proposed Blue Sky Training Program to train first responders, law enforcement agencies, local communities, and utilities on responding to unanticipated failures ...

From iron-air batteries to molten salt storage, a new wave of energy storage solutions is set to unlock resilience for tomorrow's grid.

Following similar pieces in 2022/23, we look at the biggest energy storage projects, lithium and non-lithium, that we've reported on in ...

Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector continues to grow as developers push forward with larger and larger ...

New York State aims to reach 1,500 MW of energy storage by 2025 and 6,000 MW by 2030. Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid.

Following similar pieces in 2022/23, we look at the biggest energy storage projects, lithium and non-lithium, that we've reported on in 2024.
