---

With 96% of electricity now fossil-free and pioneering projects in hydrogen and energy storage, the Nordics continue to lead in sustainable energy. However, swifter action ...

Nordic countries are rapidly deploying intermittent renewable energy sources like wind and solar power. The variable output from these sources presents challenges to grid stability, making ...

From advanced storage solutions to nuclear innovation, learn how technological breakthroughs are paving the way for a more flexible, efficient and sustainable energy future.

By examining country-specific energy data for Denmark, Finland, Iceland, Norway, and Sweden, the report provides information on what progress has been made in critical ...

The project proponents have confirmed that the construction works will start in March 2025. The project, which is one of the largest of its kind in Finland, will provide grid ...

By examining country-specific energy data for Denmark, Finland, Iceland, Norway, and Sweden, the report provides information on ...

Initial construction of the battery storage project -- which has a capacity of 5 megawatts and 10 megawatt-hours -- began in the third quarter of 2024, and it is expected to ...

Nordic countries are starting several pilot projects for carbon capture and storage, such as Mammoth Direct Air Capture plant in Iceland and Northern Lights project in Norway.

The Nordic Energy Storage market was valued at USD 4.35 billion in 2024 and is projected to reach USD 18.41 billion by 2035, growing from an estimated USD 4.98 billion in ...

Computer-generated picture of the future battery storage park in Finland. SEB Nordic Energy's portfolio company, Locus Energy, in collaboration with Ingrid Capacity, will ...

(IN BRIEF) SEB Nordic Energy's portfolio company Locus Energy, in partnership with Ingrid Capacity, is launching the largest battery energy storage project in the Nordics.
