---

Onsite solar is an asset located where the renewable energy generated will also be consumed. There are three main types of onsite solar: rooftop, ground-mount, and carport.

When a solar system is installed directly on the purchaser's property, and the renewable energy that it produces is consumed there, it's considered an onsite system.

For homes in remote areas or those seeking energy independence, an off-grid solar system offers a powerful solution. It enables households to generate, store, and use their own ...

An off grid solar energy system, paired with a solar powered refrigerator and solar powered fan, unlocks a world of sustainable, ...

Discover how off-grid solar systems can power your home or business with reliable, renewable energy--no connection to the traditional ...

Imagine a life where your electricity comes directly from the sun, freeing you from utility bills and power outages. This is the promise of off-grid solar systems. They offer a path ...

Building an off-grid solar system requires careful planning, a good understanding of your energy needs, and knowledge of electrical systems. This guide will walk you through the process, ...

What Is Onsite Solar? Onsite Solar Financing Adding Energy Storage to Your Onsite Solar System Benefits of Onsite Solar What Is Offsite Solar? Go Solar with Powerflex An offsite solar system is not located on the purchaser's property but still allows the purchaser to benefit from the renewable energy it produces in the form of credits that are used to offset their facility's energy costs. Offsite solar systems can be managed through an offsite or "virtual" PPA (structured much like an onsite PPA), where the deve... See more on
