Risc Zero is preparing to launch a service designed to use zero-knowledge (ZK) proofs to bring blockchain security to any off-chain application, according to a Sept. 16 announcement.

Microsoft later completed the acquisition of Skype, integrating it into key Microsoft products and expanding real-time communications across services including Outlook, Xbox, ...

By integrating RISC Zero's ZK proof capabilities into its architecture, Lunar Mainnet sets a new benchmark for blockchain security and efficiency. This innovative approach ensures that every ...

In plain language, it's a protocol that uses zero-knowledge proofs to let blockchains verify off-chain computations without having to execute them on-chain . It was created by ...
