---

In Poland, interest in energy storage investment has been evident for some time. Last year's main auction of the power market, with capacity delivery for 2029, further bumped ...

Poland is Europe's leading producer of lithium-ion batteries and second globally, behind only China. But the future of the industry is now in question as the EU considers ...

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery ...

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion ...

As the share of variable renewables grows, reliable energy storage solutions are more critical than ever. Battery energy storage systems, or BESS, are emerging as a key ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage ...

Poland's energy storage landscape has become a battleground between ambitious climate targets and practical grid economics. With 9GW of battery projects already permitted but only 10MW ...

PGE intends to build 85 battery storage projects that will expand its energy storage capacity to more than 17,000 MWh, a volume sufficient to supply about 2.5 million households, ...

Historically reliant on coal, PGE is now investing heavily in battery storage, wind, and solar energy to support Poland's shift toward ...
