Lyon, France's third-largest city, is pioneering smart energy solutions through innovative mobile battery storage projects. This article explores how these systems support renewable ...

On March 26, at BEPOSITIVE 2025 Lyon France, Hexon officially launched its self-developed EnerGo 1+ Portable Residential PV-ESS New Product for the European market, further ...

Learn about cutting-edge battery storage solutions reshaping Europe's energy landscape. As France accelerates its transition to renewable energy, the Lyon Energy Storage Power Station ...

This article explores the technical, regulatory, and logistical requirements of the project, its alignment with EU sustainability goals, and its implications for the global energy storage market.

This article explores how wind and solar hydrogen storage projects are transforming the region's energy landscape, offering grid stability and decarbonization solutions.

Listed below are the five largest energy storage projects by capacity in France, according to GlobalData's power database. GlobalData uses proprietary data and analytics to ...

As energy demands grow, portable energy distribution and storage systems will become pivotal in ensuring an uninterrupted power supply. With innovations such as hydrogen cells, smart ...

This project, selected through an international tender with six proposals, will be the largest energy storage system in Central America once operational by the end of 2025.

Summary: Lyon's new energy storage tender highlights France's push toward renewable integration and grid
