How many PV modules are in a solar container?

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. The lightweight, ecologically-friendly aluminium rail system guarantees a mobile solution with rapid availability. at full power.

What is a solar container?

The Solar container is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest. Panels lay flat on the ground.

What is a solar fold container?

The solar fold Container is an immaculately-detailed and sophisticated plug & play system for a wide range of applications. The mobile drive system consists of a flexible drive unit mounted on traverses and can also be used for other solar fold PV power plants.

Why should you choose solar fold for your construction project?

Major construction sites require large volumes of electricity. Solar fold can produce clean and environmentally-sustainable electricity, particularly when immense volumes of energy are needed in inaccessible areas. When construction work is completed, the mobile Solar Container can be taken down and transported to the next project site.

Our team is committed to helping you find the perfect container and delivering it quickly anywhere in Serbia. Experience hassle-free buying with reliable service from start to finish.
