-----

Serbia has revised its Baselines of the Energy Infrastructure Development Plan and Energy Efficiency Measures for the period up to 2028, with projections extending to 2030.

With five requests submitted before the adoption of the law, the number grew to 100 requests, of which 70 for solar power, whose installed power was 11 GW. The demanded ...

The document sets out priority projects in the energy sector. The original plan was adopted in mid-2023 at the proposal of the Ministry of Mining and Energy. In the new version of the plan, ...

The 1 GW of solar power and the Kostolac wind farm remained among the four most important endeavors, while the new items are the ...

The result is a new dynamic reshaping Serbia's energy transition: a strategic contest between wind and solar that will determine the country's renewable mix for decades.

In the period after 2030, a further increase of the installed capacities of wind farms and solar power plants is expected.

In August 2024, Fortis Energy and Construction DOO Beograd (Fortis Energy) and POWERCHINA International Group Limited (POWERCHINA-INTL) signed a Framework ...

Serbia plans to produce 45% of its electricity from renewable energy sources by 2030 to align with European regulations and advance decarbonization, according to the ...
