We provide you with hands-free, certified green power supply. You simply need to pay for what you use to enjoy immediate cost savings. We set up the financial structure for you to purchase ...

4.2.2 The EMA awarded \$15 million to six projects under the Energy Storage Grant Call in June 2016 to develop cost-effective energy storage solutions that can be deployed in Singapore.

Hear from our team and the Energy Market Authority (EMA) of Singapore on how this feat was achieved, and what it means for Singapore's sustainable energy future.

The successful installation of the 5 MWp offshore floating photovoltaic (OFPV) system paves the way for the potential of more OFPV projects in ...

The Singapore government has implemented a good number of initiatives to ensure the resilience of the energy grid, including the use ...

Solar containers use rooftops, parking lots, and water to save space. This helps make solar power work in crowded Singapore.

Find out how PUB is harnessing sunlight to produce clean water from clean energy, in efforts to reduce our carbon footprint.

The successful installation of the 5 MWp offshore floating photovoltaic (OFPV) system paves the way for the potential of more OFPV projects in the region as land-scarce countries tap into ...

enjoy immediate cost savings.

As Singapore seeks to harness as much sunshine as it can to maximise its limited renewable energy sources, it needs to improve technologies that can store excess solar ...

The Singapore government has implemented a good number of initiatives to ensure the resilience of the energy grid, including the use of energy storage systems ("ESS").

One such technology is energy storage systems (ESS), which are essentially giant batteries packed in containers that store electricity for ...
