-----

Singapore is emerging as a pivotal hub for a future Southeast Asian regional power grid, with upcoming interconnections to neighboring countries expected to deliver 25 GW of ...

Singapore is emerging as a key player in Southeast Asia's energy transition, with plans to tap into up to 25 gigawatts (GW) of renewable and energy storage capacity through ...

The 670MW gas power plant will be the first CCGT unit in Singapore integrated with a battery energy storage system (BESS). Mitsubishi Power Asia-Pacific will provide its ...

Research from Rystad Energy indicates that if all proposed interconnections to Singapore are realized, they could unlock up to 25 gigawatts (GW) of renewable and energy ...

Singapore could sit at the "core" of new regional electricity grids in Southeast Asia, according to research from Rystad Energy.

Singapore will achieve its target of having "giant batteries" to store at least 200MW of energy three years early. The 200MW system is ...

Sembcorp has successfully piloted a battery stacking solution at the nation's largest operating battery energy storage project, while ...

Singapore began importing up to 100 MW of hydropower from Laos via existing interconnectors between Laos, Thailand, Malaysia, and Singapore in 2022. This pilot project ...
