What is a tunnel shipping container?

Tunnel shipping containers are a popular choice for storage purposes. They have double doors at each end and they are easier to open than traditional containers. They are an excellent choice for retail stores and warehouses. They are also simple to convert, and can be modified for many different purposes.

Can a tunnel container be partitioned?

For example a standard tunnel container, i.e. a 20ft container with double doors at each end could be partitioned down the middle, leaving two 10ft x 8ft x 8ft 6" halves - each with their own access - one half could then be converted and used for office space and the other half used for secure part/equipment storage.

Where can tunnel containers be used?

They can be utilized in a variety of locations, including boiler rooms and machinery storage. Tunnel containers are a variety of sizes and help load and get access to cargo that is packed high. This feature can help save valuable personnel and improve efficiency of logistics.

Are tunnel shipping containers available for resale?

Tunnel shipping containers are typically only available in new 'one trip' condition, owners typically create them for a specific purpose so they hold onto them. There aren't many tunnel containers available for resale in used condition.

If you find our 20" RF Single Phase Container suitable for your business needs, click our quote form on this page and fill in the details if ...

A procedure for simulating a controlled deflation, folding, deployment, and inflation of a large-scale inflatable structure for sealing a tunnel cross-section has been outlined in this paper.

Tunnel Containers for sale, these specialised containers provide access at both ends of the container - so are ideal when extra access is needed.

Foreword Construction Costs Operation Costs Costs of Renovation and Upgrading Aspects Relating to Financing Tunnels are relatively expensive civil engineering structures with respect to their construction and operation. Particular attention must be paid from the beginning of the project in order to spot any possible technical and financial optimisations. It is recommended from the first stages of the design to implement a process includin...
