---

In 2020, China saw an increase in annual solar energy installations with 48.4 GW of solar energy capacity being added, accounting for 3.5% of China's ...

China is changing the world's power game. In May 2025 its solar farms made over 100 terawatt-hours (TWh) in one month. That is about one-third of all the power the United ...

China is changing the world's power game. In May 2025 its solar farms made over 100 terawatt-hours (TWh) in one month.

China is adding more solar and wind power to its energy grid than any other economy - but that huge buildout has its challenges. ...

China's first gigawatt-level offshore photovoltaic (PV) project, the world's largest open-sea solar installation, has been fully connected to the grid.

China has brought a 1 GW offshore solar power plant online off the coast of Dongying, Shandong province, combining PV with energy storage and aquaculture in what is ...

China has connected the world's first 1-GW offshore solar farm to the grid, a plant off Shandong set to generate 1.78 TWh per year.

In 2020, China saw an increase in annual solar energy installations with 48.4 GW of solar energy capacity being added, accounting for 3.5% of China's energy capacity that year. 2020 is ...

The world's largest 1 GW offshore solar farm located off the coast of Dongying, Shandong Province, China is now connected to the grid.

Support CleanTechnica's work through a Substack subscription or on Stripe. When I started covering the solar industry, the largest solar power project in the world had 100 ...

China is adding more solar and wind power to its energy grid than any other economy - but that huge buildout has its challenges. Here's what we can learn

China has more utility-scale solar than any other country. The 277 GW of utility-scale solar capacity installed in China in 2024 alone is more than twice as much as the 121 ...
