Cemex and Synhelion are on their way toward achieving a fully solar-powered cement production with the latest scaling of their technology to industrially-viable levels.

Now, having successfully demonstrated the viability of the technology under continuous and plant-like conditions, Cemex and ...

This marks a significant milestone in the companies' journey toward the world's first fully solar-powered cement plant. An early 2022 ...

Now, having successfully demonstrated the viability of the technology under continuous and plant-like conditions, Cemex and Synhelion are poised to move forward with ...

Cemex and Synhelion announced today a significant milestone in their joint effort to develop fully solar-driven cement production: the ...

Cemex and Synhelion announced today a significant milestone in their joint effort to develop fully solar-driven cement production: the scaling of their technology to industrially ...

CEMEX and Synhelion announced today the successful production of the world's first solar clinker, the key component of cement, ...

This marks a significant milestone in the companies' journey toward the world's first fully solar-powered cement plant. An early 2022 energy lab demonstration in Spain saw ...

For the first time ever, CEMEX and Synhelion successfully connected the clinker production process with the

Synhelion solar receiver, producing solar clinker. This ...

For the first time, CEMEX and Synhelion have successfully linked the clinker production process with the Synhelion solar receiver, producing solar clinker. This ...

For the first time, CEMEX and Synhelion have successfully linked the clinker production process with the Synhelion solar receiver, ...

What does cement production look like? Fuel is introduced at 2 locations, in the precalciner and the kiln. Why is cement so hard to decarbonize? What about the remaining CO₂ liberated from ...
