---

As solar and storage account for a majority of the new power on America's electric grid, this plan lays out a strategic vision to prepare the industry for the challenge of responsibly...

SEIA has a new policy agenda centered on electric reliability in the United States. The new policy agenda details actions for local, state ...

As the solar and storage industry continues to grow, SEIA's Circular Economy Roadmap provides a vision for the future of the industry that mitigates uncertainty in the ...

The Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the original ESGC 2020 Roadmap.

SEIA has a new policy agenda centered on electric reliability in the United States. The new policy agenda details actions for local, state and federal leaders to take to strengthen ...

The Solar Energy Industries Association (SEIA) published a white paper outlining the industry group's vision for U.S. energy storage, ...

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW ...

The Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the ...

In 2024, 91% of new renewable projects offered cheaper electricity than the lowest-cost, new-build fossil fuel alternative. The cost of battery energy storage systems for grid ...

The Solar Energy Industries Association (SEIA) published a white paper outlining the industry group's vision for U.S. energy storage, setting a target to install 10 million ...

Energy storage (especially long-duration and multi-day storage) may be able to resolve both transmission security constraints and provide flexibility value to the grid

In 2024, 91% of new renewable projects offered cheaper electricity than the lowest-cost, new-build fossil fuel alternative. The cost ...
