-----

Once completed, the 2,000 MW Bellefield project is expected to be the largest solar-plus-storage facility in the United States.

Terra-Gen, LLC selected Mortenson as the full Engineering, Procurement, and Construction (EPC) contractor for both the solar and energy storage scopes of the Edwards & Sanborn ...

CVE North America (CVE), a leader in community solar development, commenced construction of its first solar and battery energy storage system (BESS) in New York State, located at its ...

Power company AES Corporation has completed construction of the 1,000MW Bellefield 1 project in Kern County, California. The overall project includes 500MW of solar and ...

Governor Kathy Hochul today announced that the Port Authority of New York and New Jersey and the New York Power Authority ...

The project includes a 1,150-megawatt (MW) solar facility with approximately 3.1 million panels and up to 1,150 MW (4,600 megawatt-hours) of battery storage - enough to ...

This ambitious 2,000 MW initiative, developed under a long-term contract with Amazon, consists of two phases, each incorporating 500 MW of solar power alongside an ...

Customizable Reports. The Future of Energy. Uncover Market Insights

Governor Kathy Hochul today announced that the Port Authority of New York and New Jersey and the New York Power Authority began construction of New York State's largest ...

As the renewable energy landscape continues to evolve, two significant projects are taking shape, poised to commence operations in the first half of 2026.

There are over 1,350 major energy storage projects currently in the database, representing more than 108,000 MWh of capacity. The list shows that there are more than 185 ...

AES just completed the first half of Bellefield, which will become the largest solar + storage facility in the US. The 1,000-megawatt (MW) Bellefield 1 project in Kern County, ...
