Italy is racing to meet 2030 renewables targets, but faces grid, permitting, and skills hurdles. Explore what this means for the clean energy workforce.

The Energy Finalized Project Number 1 (PFE1) in 1972 and PFE2 in 1982 were started with the aim of promoting an energy saving culture in Italy, including energy efficiency and solar energy.

Italy is racing to meet 2030 renewables targets, but faces grid, permitting, and skills hurdles. Explore what this means for the clean ...

This article highlights the most prominent developers, EPCs, and solution providers in the Italian energy storage market, presenting the top 10 companies. These actors are ...

Find out how Terna contributes to the energy transition in Italy, monitoring and analyzing data from the main renewable sources.

In June 2024, Italy has over 650,000 connected storage systems, totaling 4.50 GW in power and 9.62 GWh in capacity. Although the majority of this capacity is linked to ...

"It is reasonable to expect that, when fully operational, all new renewable energy plants will already be installed with integrated storage systems. And where the market does ...

Whether you're a solar developer, grid operator, or sustainability enthusiast, Italy's blueprint offers actionable insights into policy-driven growth and technological leaps.

This study evaluates the role of ESS in balancing Italy's renewable energy supply taking into account the

storage technologies of hydrogen, pumped-hydro storage and lithium ...

The government has set ambitious goals for increasing renewable energy on the national grid, with a particular focus on bolstering both solar energy and energy storage ...

The government has set ambitious goals for increasing renewable energy on the national grid, with a particular focus on ...

With solar already generating 12% of national electricity, the real challenge isn't production but storage scalability. But how does a country with limited landmass and aging grid infrastructure ...
