-----

Sources of renewable energy can include solar photovoltaic cells (PV) or micro-turbine systems. These systems use inverters to operate in parallel ...

The Solomon Islands partners with an ADB-led group to build new solar PV parks and energy storage, aiming to reduce diesel dependency. Learn about this major renewable ...

With this new partnership, SPBD Solomon Islands will be able to extend its services to even more entrepreneurs and families, offering a path out of poverty and toward ...

It will set up a large off-grid solar system - the hub - at Takataka in East Are"are, Malaita. This will provide mains-quality power to run income generating assets that boost the community"s ...

The Solomon Islands partners with an ADB-led group to build new solar PV parks and energy storage, aiming to reduce diesel ...

While this project addresses energy challenges on a national scale for an island nation, it highlights the universal benefits of solar power: energy independence, cost stability, ...

While this project addresses energy challenges on a national scale for an island nation, it highlights the universal benefits of solar ...

The Solomon Islands Renewable Energy Development Project will finance two photovoltaic (PV) parks and a utility-scale grid ...

The Solomon Islands Renewable Energy Development Project will finance two photovoltaic (PV) parks and a

utility-scale grid-connected energy storage system in the ...

With this new partnership, SPBD Solomon Islands will be able to extend its services to even more entrepreneurs and families, offering a ...

Sources of renewable energy can include solar photovoltaic cells (PV) or micro-turbine systems. These systems use inverters to operate in parallel with the grid supply at your premises.

Specializing in tropical renewable solutions since 2015, we've deployed over 2,500 solar cooling systems across Pacific Island nations. Our patented battery-switch technology ensures ...
