How many battery energy storage systems are there in Europe?

The EU currently has just over 50 GWh of battery energy storage systems (BESS). To stay on track for the 2030 renewables targets, this must increase to between 500 and 780 GWh. Our core asks: "10X more battery storage in 5 years." Walburga Hemetsberger, CEO of SolarPower Europe, mentioned, "Solar and storage are the perfect pair."

What is the battery storage Europe platform?

BRUSSELS, Belgium (Tuesday 1 July 2025): SolarPower Europe has officially launched the Battery Storage Europe Platform, a major new initiative to drive forward the business case and regulatory framework for battery storage across the European Union. Juhi Dion Sud, newly appointed Head of the Battery Storage Europe Platform, said:

Who can participate in the battery storage Europe platform?

Participation in the Battery Storage Europe Platform is open to members of SolarPower Europe. Strategic Partnership opportunities are also available for organisations interested in taking a leading role in the work of the Platform. Get in touch to explore your involvement with the Platform.

Did Europe have a record-breaking year for battery storage installations?

A new analysis from the latest European Market Outlook for Battery Storage shows that Europe experienced another record-breaking year for battery storage installations, even though the year-on-year growth rate has slowed.

A new analysis from the latest European Market Outlook for Battery Storage shows that Europe experienced another record-breaking year for battery storage installations, even ...

With SolarPower Europe already established as the leading advocate for solar energy in the EU and given that solar is a major driver of demand for battery storage, the ...

The new platform will represent battery industry interests at a European Union level. That means collaborating

with policymakers and providing legislative, commercial, and ...

You've probably seen those sleek solar farms across Mediterranean hillsides. Southern Europe's installed solar capacity grew 23% last year, with wind energy following close behind.

As the leading EU voice for solar - the sector driving significant demand for battery storage - SolarPower Europe is well placed to connect its deep network to the new Platform ...

A report from Solar Power Europe urges policymakers to prioritize battery storage through an EU Energy Storage Action Plan to ensure grid flexibility, especially after the Iberian ...

Whether it's grid-side storage in Germany, capacity market projects in the UK, or solar-plus-storage systems under construction in ...

At this low cost, battery storage is being built throughout Europe, thereby enabling the potential of the south facade to be realized.

Discover how solar battery integration boosts self-consumption, lowers energy costs, and enhances energy independence across Europe's clean energy landscape.

Discover how advanced battery storage is driving the rise of south-facade solar systems across Europe.

Whether it's grid-side storage in Germany, capacity market projects in the UK, or solar-plus-storage systems under construction in Southern Europe, the demand for battery ...
