What does the European Commission say about energy storage in Spain?

La Moncloa. 17/03/2025. European Commission approves new 700 million aid scheme to boost energy storage in Spain[News]The Ministry of Ecological Transition and Demographic Challenge will promote the large-scale deployment of this technology by co-financing investments of up to 85%.

Will Spain be able to deploy large-scale electricity storage?

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities and stand-alone and thermal.

Why are battery storage options more suitable in Spain?

As a result, shorter duration storage options like batteries are more suitable in Spain. In Spain, over 50% of excess renewable energy occurs in periods where there is continuous excess for less than 12 hours i.e. a battery that chooses to charge on this energy would be able to discharge within 12 hours.

With BESS FQ, FREQCON delivers a complete solution consisting of MSC Converter, battery storage, battery and energy management systems. By using high-quality LiFePO4 or LTO ...

This section provides a study of the energy storage needs of the Spanish electricity system in the future. A total of 6 possible energy scenarios have been developed for the study, which follow ...

In Spain, subsidies for storage will be granted through four calls under the PERTE ERHA1 scheme. The PERTE ERHA includes storage, renewables and hydrogen and it is funded by ...

Provided analysis and modelling to support storage developers, investors and operators on 30+ projects, including BESS, co-located assets and long-duration storage across markets.

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in ...
