What are the different types of solar inverters?

The other popular type of inverter for solar panels is the central inverter. It functions similarly to a string solar inverter, but bigger and can handle several strings. They are used in commercial solar systems, where a lot of solar power has to be converted.

Which companies make the best solar inverters?

We carry top quality inverters from ABB,Delta Group,Enphase Energy,Fronius,Magnum Energy,Morningstar,Outback Power,Samlex Solar,Schneider Electric,SMA,SolarEdge,and many more manufacturers. Our inverters are designed for various systems,including grid-tie or off-grid,and residential or commercial applications.

Why should you buy a solar inverter?

Solar inverters make it possible to use solar energy by transforming it into usable power. When you buy a solar inverter from Solaris,you receive among the lowest price per watt in the industry,enabling you to generate a larger ROI on the cost of your system.

How much power does a solar inverter use?

The power of such an inverter can reach up to 8000 Watts. To determine the size of the required inverter,you need to calculate the total load of all devices in the power supply grid. To do this,measure the power of each device for 1 hour and summarize the obtained result. Hybrid inverters are most effective for solar systems.
