Why is Gothenburg a green port?

Through active participation in international collaborations and unique sustainability measures, the Gothenburg port cluster is positioning itself at the forefront of the global green transition. This gives us great opportunities to exercise influence, even though we are a small port from a global perspective.

What is Gothenburg port cluster?

Our ambition is to create green logistics chains so that the big picture is in focus. With innovative measures, the Gothenburg port cluster is positioning itself as a global pioneer in sustainable shipping and green energy solutions.

Does Gothenburg need electricity?

The port aims to offer shore connections well before it becomes a legal requirement in 2030. However, access to electricity is a major challenge. In 2023, the port cluster in Gothenburg made history with the world's first ship-to-ship bunkering of methanol.
