-----

Connection, a Fortune 1000 Global Solutions Provider, drives customer growth by calming the confusion of IT, guiding the connection between people and technology.

Compare glass wafers against silicon wafers across over 10 technical attributes including temperature sensitivity, electrical properties, and more.

Wafer-based solar cells refer to solar cells manufactured using crystalline silicon (c-Si) or GaAs wafers, which dominate the commercial solar cell industry and account for a significant portion ...

Get answers to your technical questions. 30-Day Free installation and diagnostic assistance for most products purchased from PC Connection. In some cases, you may be referred to the ...

At Connection, we combine deep industry expertise with a comprehensive portfolio of IT solutions to help you turn ambition into action and ideas into measurable results.

Silicon wafers have multiple applications -- not just solar panels -- and manufacturing silicon wafers is a multi-step process. Here, ...

Connection is an industry-leading, global technology solutions provider, focused on driving technology initiatives with large corporations. We connect our clients with the technology they ...

Save the Dates Interested in meeting with Connection in person? Check out the information below to learn about the events we'll be hosting. We hope to see you at one!

A standardized model is presented for evaluating the efficiency of spectral converters integrated into PV glass,
