In May 2025, Cyprus successfully commissioned its first significant battery energy storage system (BESS), marking a major step toward enhancing the country's energy ...

Cyprus' Department of Environment has approved a project for what is set to become one of the country's first battery energy storage systems with HESS Hybrid Energy ...

Cyprus has taken a step toward modernizing its energy infrastructure with the commissioning of a 3.3 MWh BESS as part of the ...

Operated by the University of Cyprus, this is the country's largest battery project to date and the first of its kind at this scale. The BESS is integrated with a 5 MWp solar PV ...

The ambitious initiative, scheduled for implementation between 2026 and 2030, will see the installation of battery storage infrastructure ...

Discover how a commercial battery energy storage system in Cyprus can reduce peak demand charges and boost your business's energy efficiency.

In 2018, Germany's Autarsys commissioned a 75 kWh lithium-ion NCM battery system in Nicosia, Cyprus. This pilot project aimed to demonstrate ...

Operated by the University of Cyprus, this is the country's largest battery project to date and the first of its kind at this scale. The ...

The energy regulator has approved a significant battery storage system totalling 120MW across three locations
