What happened at two lithium-ion battery storage projects in New York?

Image: National Grid. Fire incidents have been reported within weeks of each other at two separate lithium-ion battery storage projects in the US state of New York. No one appears to have been injured in either incident, but both look set to be offline for a period of time while investigations are conducted.

Why do lithium ion batteries get thermal runaway?

Most events had in common that the lithium ion batteries installed in the BESS were somehow driven to vent battery gas and transition to thermal runaway, which is a process that releases large amounts of energy. Thermal runaway is strongly associated with exothermic chemical reactions.

Can battery energy storage systems prevent flame propagation?

Battery energy storage system (BESS) provider Viridi recently hosted a live fire demonstration to show how properly engineered cell modules can prevent flame propagation. "The real problem is not the thermal runaway event," Jon M. Williams, CEO Viridi told pv magazine USA. "It's the propagation of a fire from one cell to another."

What is a Li-ion battery energy storage system?

2. Executive summary Li-ion battery Energy Storage Systems (ESS) are quickly becoming the most common type of electrochemical energy store for land and marine applications, and the use of the technology is continuously expanding.

Myth: You can use any compatible charger for a lithium-ion battery. Reality: Only use the charger designed for your specific battery. Incorrect charging can cause the battery to expel its charge ...

A BESS fire at the PG& E battery storage substation in California resulted in total destruction of a Tesla MegaPack container with lithium-ion batteries in September of 2022.

Lithium-ion batteries contain flammable electrolytes, which can create unique hazards when the battery cell

A thermal runaway sequence inside a battery cannot be stopped by any external firefighting means and, hence, a realistic objective is to limit the fire spread within or close to the affected ...

Three residents and a firefighter were injured when a lithium battery sparked a fire in a Queens, NY townhouse on Friday morning. News footage from the scene shows several ...
