-----

Battery energy storage already plays a role in some segments of the Ukrainian electricity markets and in many small off-grid power systems in handling war-related power outages.

DTEK and Fluence aim to complete construction and grid-connection by late October 2025, ensuring the assets are operational well ahead of the 2025-26 winter season. ...

Ukraine's 200 MW/400 MWh battery project dwarfs most Eastern European installations, and is expected to come online in ...

The new battery storage systems are expected to enhance the security of electricity supply and reduce the risk of outages and grid ...

In the spring of 2025, Ukraine's energy sector finds itself at a crossroads. Underneath the constant hum of reconstruction and the lingering threat of war, a quiet ...

DTEK and Fluence aim to complete construction and grid-connection by late October 2025, ensuring the assets are operational well ...

Six new battery storage systems of varying capacities - from 20 to 50 MW each - have been connected by DTEK to the power grid in the Kyiv and Dnipropetrovsk regions. Collectively, ...

DTEK & Fluence launch 200MW/400MWh battery storage in Ukraine, featuring remote commissioning amid war. Projects to stabilize grid by October 2025.

Ukraine's 200 MW/400 MWh battery project dwarfs most Eastern European installations, and is expected to come online in October 2025, ahead of the winter.

Ukraine's biggest private energy firm, DTEK, has launched a major battery storage facility that will bring power to hundreds of thousands of homes and strengthen the grid ahead ...

On July 10 - Maxim Timchenko, CEO of DTEK, led a session at a URC stage, launching Ukraine's biggest-ever battery storage project, ...

IPP DTEK Group and system integrator Fluence have together put a 200MW/400MWh BESS portfolio in Ukraine into ...
