What is an uninterruptible power supply?

Read more about our editorial standards. An uninterruptible power supply, or UPS, is basically a surge protector, battery, and power inverter-- which turns the battery's stored energy into usable power -- in one.

Does uninterruptible power supply USP provide surge protection?

Many models of uninterruptible power supply USP also provide surge protection. A surge protector blocks spikes in voltage so that they do not harm your electronics. So, your battery backup is always at work, protecting your desktop computer, network equipment, or other electronic equipment and charging its battery when not in use.

What happens if a power ups voltage is distorted?

The voltage distortion then can cause problems in all electrical equipment connected to that power source, including the UPS itself. It will also cause more power to be lost in the wiring supplying power to the UPS due to the spikes in current flow.

Established in 2002, Foshan Unipower Electronic is a manufacturer of high-quality uninterrupted power systems (UPS). They manufacture and supply their own SVC brand's UPSs, inverters ...

APC, a flagship brand of Schneider Electric, provides clean battery back-up power, surge protection, and IT physical infrastructure inside and outside the traditional IT environment to ...

Uninterruptible Power Supply with External Battery systems are crucial for keeping communication networks running during power disruptions, ...

Uninterruptible Power Supply with External Battery systems are crucial for keeping communication networks running during power disruptions, supporting essential services such ...

SVC UPS SL-600L 600VA/300W with LCD Display for Lift Motor Room, Uninterruptible Power Supply

with External Battery Delay Sine Wave

An uninterruptible power supply (UPS) or uninterruptible power source is an electrical apparatus that provides emergency power to a load when the input power source or mains power fails.
