Why is Victoria advancing solar and storage projects?

Victoria is advancing solar and storage projects as it prioritizes renewable energy developments under the DFP. (Illustrative Photo; Photo Credit: Scharfsinn/Shutterstock.com)

Will Victorian Government approve a battery energy storage system?

The Victorian government has fast tracked the approval of what is to be one of the state's biggest battery energy storage systems as it seeks to accelerate the development of projects to support its renewable energy ambitions.

Where is Energy Australia constructing a battery energy storage system?

Energy Australia is planning a 350 MW/1.4 GWh project next to its Jeeralang gas-fired power station, in Victoria, and Acen is constructing a 200 MW/400 MWh battery energy storage system (BESS) next to its New England solar farm, in New South Wales (NSW).

How many energy storage projects are there in western Victoria?

In March 2018, 2 projects in Western Victoria were chosen to be part of The Energy Storage Initiative - one in Ballarat and one in Gannawarra. Construction for the Ballarat and Gannawarra Energy Storage Systems was completed in late 2018. Both batteries began operating over the summer of 2018 and 2019.

Victoria's clean energy transition is accelerating with the approval of a \$453 million Battery Energy Storage System (BESS) in north-east Victoria, backed by leading Chinese firm ...

The Victorian government has fast tracked the approval of what is to be one of the state's biggest battery energy storage systems as ...

Australia's Victoria government has expedited plans for a 400MWh battery energy storage system (BESS) and a 500MW solar-plus-storage project through its Development ...

Victoria, Australia, has seen just under 5GWh of battery energy storage systems (BESS) granted approval for development by the state and federal governments.

Victoria, Australia, has seen just under 5GWh of battery energy storage systems (BESS) granted approval for development by the ...

The Victorian government in Australia has expedited approvals for 2 major renewable energy projects - a 500 MW solar farm integrated with a 300 MW battery energy ...

Storage is a vital part of our electricity grid. In the future, much of our energy will be generated closer to where it is used and the way we use it will be more efficient.

EnergyAustralia is planning a 350 MW/1.4 GWh project next to its Jeeralang gas-fired power station, in Victoria, and Acen is constructing a 200 MW/400 MWh battery energy ...

The implications of this energy storage project stretch far beyond the borders of Victoria. With global energy demands increasing and the urgency to reduce fossil fuel reliance ...

The Victorian government has fast tracked the approval of what is to be one of the state's biggest battery energy storage systems as it seeks to accelerate the development of ...

The Victoria government in Australia has approved a 300MW/1,200MWh battery energy storage system (BESS) in Gippsland and a 332MW solar PV power plant with ...

Edify Energy has proposed a major new solar-plus-storage facility in Victoria, signaling another significant step in the state's transition to renewable energy.
