-----

Vietnam's Revised Power Development Plan 8 (PDP8), approved in April 2025, marks a significant shift toward renewable energy and energy storage to achieve net-zero ...

While the country has successfully deployed large-scale solar farms, the combination of distributed rooftop systems with energy storage at industrial scale remains ...

Vietnam greenlights two new solar power plants and two large-scale battery storage systems (BESS) in its northern provinces to advance its renewable energy goals.

Vietnam's Ministry of Industry and Trade mandates 15% storage for new renewable projects (up 5% from 2024), triggering a 300% surge in 2025 storage tenders. Industrial park ...

Establishing national standards and regulations for BESS is crucial for reducing technical and financial risks and creating a clear legal framework to attract both domestic and ...

Vietnam greenlights two new solar power plants and two large-scale battery storage systems (BESS) in its northern provinces to ...

Vietnam's battery energy storage market is gaining momentum, driven by a combination of rising electricity demand, increasing renewable energy penetration, regional ...

Vietnam is now well-positioned to transition to the next phase of its clean energy journey - adopting cost-effective models such as competitive green auctions for renewables, ...

This monumental increase, from just 300MW to at least 10GW, is the first time Vietnam has set a serious, actionable goal for energy storage. It's a testament to government's ...

Among the key objectives were the upgrade of the power transmission and distribution system, acceleration of the roadmap to build a smart power system, and development of an energy ...

Vietnam sharpened its national energy-storage roadmap this week as government leaders, technical agencies, utilities, and industrial operators aligned on the next phase of ...
