Does Vietnam have new feed-in tariffs for solar power?

April 2025 | Southeast Asia Impact Alliance Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS).

How does fit affect electricity prices in Vietnam?

FiT guarantees above-market rates for electricity over a 20-year period. However, the high tariffs increased losses for Vietnam's state-owned power utility EVN, the only buyer of the generated electricity, and led to an increase in power prices for households and factories.

Why should Vietnam invest in solar power?

Vietnam can leverage domestic solar manufacturing to meet domestic demand, implement direct power purchase agreements (DPPAs) enabling private renewable supplies, accelerate grid and battery storage infrastructure, and avoid costly LNG imports by prioritizing renewables.

What is the electricity price framework for solar power plants in 2025?

The electricity price framework for 2025 applicable to solar power plants is specified as follows: - For ground-mounted solar power plants without battery storage systems, the maximum price (excluding value-added tax) is Northern region: 1,382.7 VND/kWh; Central region: 1,107.1 VND/kWh; Southern region: 1,012.0 VND/kWh.
