This topic covers: - Intercepts of linear equations/functions - Slope of linear equations/functions - Slope-intercept, point-slope, & standard forms - Graphing linear equations/functions - Writing ...

What are rational functions? What is their domain and range? We break down the definition of the function given in set-builder form and plot the graph ...

A function is like a machine that takes an input and gives an output. Let's explore how we can graph, analyze, and create different types of functions.

About this unit A function is like a machine that takes an input and gives an output. Let's explore how we can graph, analyze, and create different types of functions. Unit guides are here!

Equations and functions are not the same thing, but they can be related in several ways. Watch Jesse Roe and Sal talk about the difference between equations and functions.

This topic covers: - Evaluating functions - Domain & range of functions - Graphical features of functions - Average rate of change of functions - Function combination and composition - ...

Determine whether a given graph represents a function.

Functions assign a single output for each of their inputs. In this video, we see examples of various kinds of functions.

In this unit, we learn about functions, which are mathematical entities that assign unique outputs to given inputs. We'll evaluate, graph, analyze, and create various types of functions.
