Utilities frequently propose new storage deployments, even in states and regions where legislative mandates are not in place, noting ...

With the ability to accommodate multiple battery formats and chemistries -- from cylindrical to pouch to prismatic cells -- Battery-NY comes as both a ...

Standalone BESS projects as well as BESS coupled with renewable energy generation components - hybrid plants - are some of the most common resources being studied for ...

Enel North America has begun construction on three front-of-the-meter battery storage systems in Westchester County, New York to ...

Standalone BESS projects as well as BESS coupled with renewable energy generation components - hybrid plants - are some of the most common ...

Across the United States, battery energy storage is rapidly emerging from a niche technology into mainstream grid infrastructure. The growing attractiveness of battery energy ...

HCI Energy, LLC, a leader in resilient hybrid energy systems, is proud to announce the launch of its Power Cabinet, a smart, compact power platform engineered to meet growing ...

Historic amounts of energy storage, primarily lithium-ion battery systems, are being added to the U.S. grid, driven by a need to balance renewable generation and to meet load ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery
