What is ninedot's new battery energy storage project?

An innovative battery energy storage installation supported by NYSERDA brings grid benefits and decarbonization into a crowded urban area. NineDot's first battery project on a very small plot of land in the northeast Bronx went live in 2023. Source: NineDot Energy. Active site: 7,000 square feet (1/6 of an acre)

How does the tech sector support nuclear startups?

Nuclear startup companies and industry stalwarts alike are racing to deploy advanced reactors that could make plants cheaper and quicker to build. The tech sector is playing an increasingly influential role by often helping finance the companies. Here's a look at three companies with customers secured and significant financial backing.

Are technology companies a catalyst for the energy industry?

Technology companies will serve as a catalyst, with Levesque saying they are a "huge force" that can drive the industry forward due to their immense demand for electricity coupled with their deep pockets. Alphabet, Amazon, Meta and Microsoft together are worth seven times the value of the entire S&P 500 utility sector.

Duke Energy first announced the possibility of a small module reactor nuclear plant in Stokes County in 2023. Norton said for the past two years the utility has been studying the ...

Battery energy storage is a critical piece of infrastructure that will strengthen the resilience and reliability of the New York City electricity grid as it transitions to a clean energy ...

Founded as a New York-based company and located at the NYU Urban Future Lab, NineDot creates innovative urban energy solutions. They currently have BESS sites in the Bronx, ...

Battery energy storage is a critical piece of infrastructure that will strengthen the resilience and reliability of the New York City electricity ...

NYCIDA Approves Four Battery Energy Storage Projects in Queens and Staten Island. Battery Storage Will Power New York's Clean Energy Transition, Increasing Resilience ...

Now NineDot Energy (reflecting the Company's broader energy vision), the Company announced the first Tesla Megapack Site in New York, a milestone in the city's energy transition and a ...

Now NineDot Energy (reflecting the Company's broader energy vision), the Company announced the first Tesla Megapack ...

SMRs are fission reactors generating between 5 megawatts (MW) and 300 MW, which are factory constructed and brought to a site. Several units can be linked together to ...

The nuclear industry is racing to launch advanced small reactors by the early 2030s, aiming to meet the deep-pocketed technology sector's growing need for electricity to ...

Duke Energy has formally entered the early stages of nuclear development planning in North Carolina, submitting an early site permit (ESP) application to the U.S. Nuclear ...

SMRs are fission reactors generating between 5 megawatts (MW) and 300 MW, which are factory constructed and brought to a site. ...

Duke Energy has submitted a technology-neutral application to the US nuclear regulator for an early site permit for potential small modular reactors at a site near the Belews ...
