-----

To meet current challenges, such as limited grid capacity and increased loads, while optimizing OPS needs, the project will develop a comprehensive microgrid solution that ...

The demonstration project for the collaborative effort--connecting wind, solar and battery storage--is starting in the Port of Kapellskar, one of several cargo and passenger ports ...

Looking for reliable portable energy storage in Stockholm? Discover how modern power stations are transforming outdoor adventures, emergency preparedness, and mobile worksites.

ESS - Energy storage Energy Storage System - ESS, we can offer system solutions for small installations from 100 kW for smaller industries to large systems of 100 MW.

Polarium provides turn-key modular energy solar storage solutions. Our storage solutions turns your solar energy into a dispatchable asset. BatteryLoop is a manufacturer of a scalable and ...

The project is a collaboration between Ports of Stockholm, the University of Skovde, Stella Futura, and Ilmatar. It is scheduled to run from November 2024 to November 2027, with ...

Ports of Stockholm, in collaboration with partners, launched an innovative project combining onshore power supply (OPS) with ...

Ports of Stockholm, in collaboration with partners, launched an innovative project combining onshore power supply (OPS) with microgrid technology to enhance sustainability.

This project aims to reduce emissions, improve energy efficiency and increase the port capacity to meet growing energy demands. The microgrid solution integrates solar cell ...

From solar-integrated units to emergency backup systems, this guide breaks down the options available in Sweden's capital - and why they matter for sustainable energy transitions.

Just last month, Stockholm unveiled Northern Europe's largest lithium-ion storage array - 150 connected containers storing enough energy to power 45,000 homes during winter blackouts.
