What is solar power potential in Armenia?

Solar power potential in Armenia is 8 GW according to the Eurasian Development Bank. The reason for this is that average solar radiation in Armenia is almost 1700 kWh/m² annually.

How much solar energy does Armenia produce a year?

According to the Ministry of Energy Infrastructures and Natural Resources of Armenia, Armenia has an average of about 1720 kilowatt hour (kWh) solar energy flow per square meter of horizontal surface annually and has a potential of 1000 MW power production.

Where is the biggest solar water heater in Armenia?

The biggest solar water-heater in Armenia is located at Diana hotel in Goris, which has 1900 vacuum tubes that provide hot water for a swimming pool with 180 cubic meter volume, and for 40 hotel rooms.

Which buildings have solar panels?

Example of buildings equipped with solar panels are the American University of Armenia generating enough power for the elevators and other uses, and the UN House in Armenia. A 55 MW utility-scale solar power plant will be built near Mets Masrik in Gegharkunik province, requiring an investment of about \$50 million.

Our specialists have more than 10 years of experience in the field and know all the subtleties of designing and installing solar systems. We have implemented more than 500 projects both in ...

Discover our solar container power solutions offering reliable, modular, and off-grid renewable energy. Ideal for remote sites, disaster recovery, and industrial applications.

Unleash massive power on the move with our 5000W Portable Power Station. Your compact yet robust solution for limitless energy wherever you venture

About the item ? Power Your Adventures with GRECELL! The GRECELL Portable Powerstation H2400 is a robust solar generator with a peak output of 4800W and a massive 1843Wh ...
