Swiss startup Sun-Ways is set to launch a world-first project by installing removable solar panels on active railway tracks. The pilot project, beginning in Neuchatel in 2025, will test ...

Imagine mile-long trains with 120 or more battery cars, charging up where wind and solar power is cheap and making daily deliveries of over two ...

Last year, word dropped that a Swiss firm had developed a new rapid-fire system for installing solar panels between railroad ties. That's a clever way to maximize railroad ...

Swiss startup Sun-Ways is set to launch a world-first project by installing removable solar panels on active railway tracks. The pilot ...

Last year, word dropped that a Swiss firm had developed a new rapid-fire system for installing solar panels between railroad ties. ...

To harness the PV potential of non-operational railway lines, SNCF's subsidiary, AREP, has developed a ...

In this work, a methodology based on a geographic information system was established to evaluate the PV potential along rail lines and on the roofs of train stations. The ...

A large battery mounted on a flatbed wagon in a railway siding at San Francisco port next to a small solar power installation shows how his vision is beginning to materialise.

Imagine mile-long trains with 120 or more battery cars, charging up where wind and solar power is cheap and making daily deliveries of over two gigawatt-hours of clean energy each--enough ...
