Who is responsible for the energy sector in Zimbabwe?

The MOEPD has overall responsibility for the energy sector in Zimbabwe. It is responsible for policy formulation and implementation, an oversight role over the government-owned utilities (ZETDC and ZPC), ZRA jointly with Zambia and the activities of ZERA. It is also responsible for regional and international cooperation on renewable energy issues.

What is "renewable energy" in Zimbabwe?

The NREP defines "renewable energy" as referring to "small hydro (equal to or less than 30MW), solar, wind, geothermal, biofuels and biomass and other such clean energy sources approved by the Ministry responsible for Energy in Zimbabwe".

What is ZESA's net metering programme?

ZESA has, in the last months, pushed to encourage consumers with their own solar installation to join the net-metering programme as a measure to increase the power that is being fed into the grid. The drive is targeting individual households and other smaller producers with their own renewable energy sources.

Who can appoint a senior manager in Zimbabwe?

The ZIDA Act permits an investor to appoint, regardless of their nationality, any qualified individual as a senior manager, technical and operational expert or advisor with respect to the investment in accordance with the laws of Zimbabwe. Work permits would be required for such employees.

For a single unit of generation greater than 500MW They shall not be a single unit of generation greater than 500MW maximum export limit for economic and cost effective management of ...
